

SAHIL KUMAR

Software Engineer — Full-Stack Developer — AI Engineer

Gurugram, India — +91-6302936254 — augsahilk@gmail.com

linkedin.com/in/augsahil — github.com/augsahil

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Python, SQL, HTML5, CSS3

Frontend: React.js, Next.js, Redux, Tailwind CSS, Material-UI, Storybook, Emotion

Backend: Node.js, Express.js, FastAPI, REST APIs, Webhooks, JWT Authentication, Microservices

AI/ML: LangChain, LangGraph, RAG, LLM Integration, Multi-Agent Systems

Databases: MongoDB, MySQL, PostgreSQL

DevOps & Cloud: Azure, AWS, Docker, Jenkins, CI/CD Pipelines, Git/GitHub, Azure DevOps

Core: Data Structures & Algorithms, System Design, OOP, Agile/Scrum, Performance Optimization

Professional Experience

Software Engineer

October 2022 – Present

Accenture, India

Gurugram, India

Backend AI Engineering

- Architected AI-driven SEO automation system using FastAPI, LangGraph, and RAG pipelines, orchestrating 8+ specialized AI agents for content analysis, metadata generation, and comprehensive SEO auditing
- Integrated OpenAI LLMs with LangGraph for consistent, context-aware content generation and multi-step validation workflows, reducing manual content review time by 60%
- Built Azure Storage pipelines supporting automated PDF/Excel generation for enterprise reporting and analytics
- Developed scalable comparison engines processing large Excel datasets with optimized algorithms and data structures
- Implemented real-time voice-streaming backend services for AI-assisted communication using Python, LiveKit (WebRTC), and WebSockets, enabling bi-directional audio with sub-second latency
- Containerized microservices with Docker and automated deployments using Azure DevOps CI/CD pipelines, achieving 50% faster release cycles

Full-Stack Development (Frontend-Centric)

- Engineered reusable UI component systems using React.js, Next.js, Tailwind CSS, MUI, and Storybook for Fortune 500 clients, reducing development redundancy by 40% across enterprise projects
- Delivered accessible, high-performance interfaces improving Lighthouse scores by 30%, optimizing Core Web Vitals and ensuring WCAG compliance
- Integrated complex frontends with REST APIs, JWT authentication flows, and microservices architectures, handling millions of user sessions
- Developed full-stack features using Node.js, Express, MongoDB, and MySQL, building scalable backend services with 99.9% uptime
- Collaborated within global Agile team on sprint delivery, code reviews

Key Projects

AI Medical Assistant Chatbot

FastAPI, LangChain, Groq LLaMA3-70B, Pinecone, RAG

- Built a production-grade medical chatbot using RAG, FastAPI, Pinecone, and LangChain for grounded, domain-accurate responses
- Implemented pipelines for PDF ingestion, chunking, embedding generation, and semantic vector search with Groq
- Delivered a chat UI with document management, history export, admin features, and deployed it

AI Voice Assistant Platform

Python, React, LiveKit WebRTC, Speech-to-Text/Text-to-Speech

- Developed a real-time voice assistant supporting bi-directional audio streaming with LiveKit OpenAI
- Built backend services in FastAPI, session control, call routing, transcription, and AI-assisted operator suggestions
- Developed a responsive JavaScript/React frontend to control call sessions, handle live audio streams, and present AI-generated transcripts and suggestions

Notes Manager with AI Analytics

Next.js, TypeScript, MongoDB, FastAPI

- Built full-stack notes application with AI-driven productivity insights using Next.js App Router and Python FastAPI microservices
- Implemented CRUD APIs, server actions, and modern UI with Tailwind CSS and Emotion for responsive design

Education

Bachelor of Technology in Computer Science Engineering

Aug, 2018 – Aug, 2022

National Institute of Technology, Andhra Pradesh

CGPA: 7.7/10

Certifications & Achievements

Training: AWS Certified Data Engineering Associate — GCP Associate Data Practitioner — Structured Communication Technology — Software Processes and Agile Practices

Achievements: Improved accessibility and performance metrics by 30% across major Accenture applications — Recognized for delivering production-ready code under tight deadlines — Led multi-team initiatives across frontend, backend, and AI microservices
